

# PrintaClean

---

## PRODUCTDESCRIPTION

### English

What part of any task do most people hate? Probably the cleanup. To make this process easier for 3D Printer we created PrintaClean, an effective solution to clean your printbed. This powerful solvent removes all of the nasty sticky residue with ease.

#### **Application:**

If possible remove the printbed from the 3D printer Spray a good amount of solution on the printbed. Let it sit for 20-30 seconds to loosen the residue. Wipe off with a paper towel.

PrintaClean contains Ethanol. For cleaning your printbed attend to manufacture's advice.
