## XPETG Matt

### DESCRIPTION

Polyethylene Terephthalate Glycol (PETG) is one of the world's most common thermoplastic polymers. Extrudr XPETG Matt was developed for a wide range of applications where the main requirement is a good balance between mechanical and optical material properties. The raw material is approved according to the REACH- and RoHS-Standards.

### FEATURES

- Good mechanical properties
- High chemical resistance
- Low warping tendency
- Low shrinking
- Recycleable
